Hiring Manager

Wipro

RE: C#.NET Developer (MS Azure & Kusto) Application

Dear Hiring Manager,

I am excited to apply for the C#.NET Developer (MS Azure & Kusto) position at Wipro. With over 8 years of experience designing and building scalable backend systems using C#, .NET, and Microsoft Azure, I have developed a strong foundation in microservices architecture, cloud-native applications, and CI/CD pipelines that I am eager to bring to your team.

In my current role as Software Engineer III at Staples, I designed and implemented an ASP.NET Core microservice architecture to automate complex routing logic, resulting in \$770K in annual cost savings. I also leveraged Azure Data Explorer (KQL) and Application Insights for telemetry and monitoring, integrating automated workflows to improve operational efficiency by 20%. Additionally, I have extensive experience managing end-to-end build pipelines in Azure DevOps, ensuring secure, reliable, and high-availability deployments for production systems.

I am particularly drawn to Wipro because of your commitment to digital transformation and innovation. I am confident that my combination of cloud engineering expertise, backend development experience, and passion for creating efficient, scalable solutions aligns with the needs of your team. I thrive in collaborative environments and enjoy working with cross-functional teams to deliver impactful software solutions.

I would welcome the opportunity to discuss how my skills and experience can contribute to Wipro's projects and goals. Thank you for considering my application, and I look forward to the possibility of speaking with you further.

Sincerely,

Nanda Rampura
