PROFESSIONAL SUMMARY

Outcome-oriented Software Engineer with over 10 years of experience specializing in building secure, high-performance applications and RESTful APIs. Proven track record of delivering significant business value, including **\$1.7M+ in annual cost savings** through automation and microservices architecture. Experienced in leveraging **AI-assisted development workflows** to accelerate implementation planning, streamline code reviews, and maintain high-quality standards in fast-paced Agile environments.

TECHNICAL SKILLS

- **Languages:** Python, C/C++, Java, C#, .NET Core, ASP.NET, HTML, JavaScript, CSS, JSP.
 - **Cloud & Infrastructure:** Microsoft Azure (App Service, Service Fabric, WebJobs, Service Bus, App Insights), ARM templates, Docker, CI/CD Pipelines.
 - **Data & Caching:** MS SQL Server, MySQL, Redis, JSON, XML, JDF/JMF.
 - **Architecture & Tools:** Microservices, REST APIs, Windows Services, Event Sourcing, Service-Oriented Architecture, Git, Azure DevOps, Jira, Visual Studio, Postman, Swagger.
-

PROFESSIONAL EXPERIENCE

Staples | Austin, TX Software Engineer III | April 2023 – January 2026

- Utilized AI-assisted development tools to generate implementation plans, high-quality code, and unit tests, ensuring reliability through rigorous manual review.
- Employed AI tools for comprehensive code reviews and rapid context-gathering on unfamiliar codebases, enabling faster technical decisions during Agile sprints.
- Led the development of a microservice in .NET and MS SQL Server to automate print job routing, resulting in **\$770K in annual cost savings**.
- Developed backend APIs in C# and upgraded Windows Services for end-to-end print automation, reducing job fulfillment time by **30%**.

Software Engineer II | June 2021 – March 2023

- Led the redesign of the print job dashboard by restructuring backend data models and APIs, creating a responsive interface that reduced navigation time for retail locations.
- Redesigned the thumbnail generation service to eliminate performance bottlenecks across multiple production applications.

Software Engineer | January 2020 – May 2021

- Developed a .NET Core microservice for ship-date estimation using Redis cache and Azure Service Bus, deployed on Azure Service Fabric.
- Implemented CI/CD pipelines and developed Azure WebJobs for automated data transmission and historical record archiving.
- Designed and implemented a cost estimation workflow with REST APIs and in-memory caching for business data.

Junior Developer | June 2017 – December 2019

- Automated in-store print order fulfillment using JDF/JMF, achieving **\$1M in annual cost savings** and reducing manual effort by **50%**.
- Developed REST APIs to integrate shipping applications with order management systems using the Event Sourcing pattern.
- Migrated report generation tools from DevExpress to DynamicPDF, increasing feature delivery speed by **25%**.

Tata Consultancy Services | India Systems Engineer | July 2010 – April 2013

- Implemented service record management and revenue loss prevention systems for major telecom clients using Java, J2EE, HTML, and JSON.
- Developed shell script-based detection rules and visualization dashboards using Java Servlets and JSP.

EDUCATION

- **Master of Science: Computer Engineering** | University of North Texas | **GPA: 3.9**
- **Bachelor of Engineering: Electrical & Electronics Engineering** | Visvesvaraya Technological University
